

Dear Hiring Team,

I am writing to express my interest in the opportunity at your organization. I am currently pursuing a B.Tech in Computer Science and Engineering at Maharaja Agrasen Institute of Technology and have developed a strong interest in full-stack development, backend engineering, AI-powered applications, and product building.

Currently, I am working as a Full Stack Intern at Red Hawk Consultancy, where I am helping build EDAOS, a multi-school ERP platform. My responsibilities include architecting and developing 55+ REST APIs, building backend modules, designing workflows, managing database entities, and contributing to both frontend and backend development. I also work closely with developers and UI/UX designers to translate requirements into scalable product features.

Beyond my internship experience, I have built multiple full-stack projects, including an AI-powered credibility analysis platform, a housing and flatmate-matching application, and a real-time chat system. These projects have strengthened my skills in React.js, Next.js, Node.js, Express.js, MySQL, MongoDB, REST APIs, authentication systems, and AI-assisted development workflows.

What excites me most about software engineering is the opportunity to solve real-world problems through technology. I enjoy understanding complex systems, breaking them into manageable components, and building reliable solutions. I am particularly interested in environments that encourage ownership, rapid learning, collaboration, and innovation.

I would welcome the opportunity to contribute my skills, learn from experienced professionals, and grow alongside your team. Thank you for your time and consideration. I look forward to the possibility of discussing my application further.

Sincerely,

Dishant Pandey
